## PROTECT AND RESTRAIN

The Monadnock® brand has a rich history of pioneering state-of-the-art American-made batons and training aids that has defined the way law enforcement professionals operate, train with and purchase batons for more than a half century. Our heritage and expertise focuses on our primary objective: providing the highest quality products to the men and women who depend on them every day.

Additionally, Monadnock now offers the legendary Hiatt® brand of metal restraints, along with riot control suits and accessories in both hard and soft shell versions, offering a one-stop-shop for protective less lethal gear. There's a reason Monadnock products are the preferred choice of law enforcement professionals around the world - we simply build our products better.

# AUTOLOCK® X3™ BATONS

The Monadnock® AutoLock® X3™ expandable baton improves its original positive locking design with notable improvements which include an updated cam and stainless steel ball bearing design which offers reliably consistent locking action. A more solid feel in the hand when performing or demonstrating techniques and a new smooth plastic nose on the baton handle for more efficient holstering and transition from the holster to the hand. New blackened electroless nickel finish improves corrosion resistance on the inside and outside of the baton. See our website for more information about these batons.

### MONADNOCK® EXPANDABLE BATON

// (MEB) INSTRUCTOR COURSE

This dynamic 2-day course is like no other because it provides you with useful defensive skills in all three zones of defense, especially for close quarter battles (CQB). It relies heavily on practical hands-on applications and is intended for first responders who want instruction in the proper uses of straight batons (expandable or rigid) used for self-defense and subject-control, for escort and handcuffing.

Contact the Safariland Training Group for details to take or host this course.

# ULTRALITE™ FRICTION LOCK BATONS

The Monadnock® Ultralite baton is the most lightweight friction lock baton ever designed by Monadnock. The Ultralite features a carbon-graphite reinforced handle providing an impressive 35% weight reduction and a high strength-to-weight ratio. Each year officers are required to carry more and more gear on their duty belts, this baton is the answer to weight reduction without sacrificing performance or protection.

# BATON TIP, GRIP AND FINISH OPTIONS

Monadnock batons feature a wide variety of grips, tips and finishes to allow you to choose the tool that best fits your duty requirements.

## TIPS

**Standard Steel Tip**  
Allows for opening the baton in a high-profile manner; may gain psychological advantage for officer over subject.

**Safety Tip®**  
Reduces sharp edges; urethane covering allows passive drawing of the baton.

**3xT Tactical Training Targeting Tip**  
Featuring the Power Safety Tip that helps criminal justice professionals improve their striking skill because they can clearly see the track of the baton's tip during demonstrations, practice and/or in the street. Lime green only.

**Power Safety Tip®**  
Engineered to put more weight forward to better balance the baton in the hand and improve kinetic energy transfer at the moment of impact. The larger tip surface may turn a subject's pockets inside out, reducing the risk of getting stuck with sharp objects.

## GRIPS

**Foam Grip**  
Offers the highest tear strength and allows quick access from the Front Draw® Holder.

**Super Grip®**  
The fluted surface texture provides excellent baton retention in and out of the holder.

**Grenade Grip**  
Offers a ridged handle design for a sure grip.

**Knurled Grip**  
The knurled grip enhances baton retention while performing strikes, blocks or jabbing techniques.

### HIATT® TACTICAL HANDCUFFING

// INSTRUCTOR TRAINING COURSE

Handcuffs are used more than any other tool in law enforcement and, unfortunately, many officers are placed in vulnerable positions or hurt during the handcuffing process. This course presents simple, effective techniques that allow officers to quickly control and handcuff an individual by using handcuffing skills that can be performed whether a subject assumes a kneeling, standing or prone position.

# METAL RESTRAINTS

TAKE CONTROL. AND KEEP IT.

Hiatt® handcuffs offer a variety of unique features designed to address the needs of today's law enforcement personnel. Our fast back-loading application allows an open cuff to be snapped back into place with a quick motion of the wrist and then reapplied without having to release the offender's hand. With 18 teeth, 3 independent retaining bars with 6 teeth on each, we make it extremely difficult to pick, while providing increased strength as the shackle engages the additional teeth. Finally, True Swing Technology ensures the swing arm is balanced and centered so it locks into the center of the shackle every time.
