CONCEALABLE ARMOR

CONCEALABLE ARMOR SOLUTIONS

ABA® sets the industry standard in ballistic protection. Utilizing the greatest in engineering technologies and design with next generation materials, ABA provides the optimum in performance and style when it comes to armor.

Second Chance® body armor is made with pride and a long-standing history of time-proven results, which is driven by our dedication to saving lives. Our body armor is recognized for comfort and consistent reliability.

ARMOR TECHNOLOGIES

To meet the growing needs of the law enforcement community, our armor engineers strive to develop innovative designs and incorporate technologies that maintain the lightweight, high performance and comfort officers have come to trust in all of our armor brands.

HYBRID ENGINEERING

With the continuing advancement in the science of ballistic engineering, we have made it a goal to constantly challenge our team of experts to deliver the lightest, most flexible ballistic packages in the industry. Our hybrid engineering, combining patented technologies with exclusive armor solution materials from the best suppliers in the industry, enables us to deliver an entirely unique and unsurpassed product to our customers.

RESEARCH AND DEVELOPMENT

Our family of armor solutions offers an array of state-of-the-art packages for unprecedented ballistic, fragmentation and trauma reduction protection. We maintain one of the most advanced armor-testing laboratories in the nation, allowing for our team of highly trained engineers to advance our analysis of ballistic properties. Our laboratory tests a variety of products including ballistic, spike, edge blade, multi-threat and fragmentation-resistant soft and hard armor. With the advent of the NIJ Standard-0101.06, our laboratory facilities now include two ranges to test against high-velocity handgun and rifle threats. The test lab also features armor-conditioning equipment and hard armor and impact thermal testing equipment.

The Safariland Vest Check™ program provides law enforcement agencies with statistical data on the tested performance of its armor throughout the body armor's warranted life. Vest Check is a collection of data from samples worn in the field and tested for ballistic integrity, durability, protection and comfort. The test data gathered from field samples help our armor engineers continue to improve and develop armor that meets and exceeds the needs of its customers.

TESTING STANDARDS

NIJ STANDARD— 0101.06

At The Safariland Group, we offer armor solutions that meet or exceed the National Institute of Justice (NIJ) standards. The stringent testing requirements set by the NIJ are designed to ensure body armor meets a certain level of performance and safety for the law enforcement community. Enhanced test procedures under NIJ-06 are detailed below.

- Changes to projectile velocities and rounds
- Environmental conditioning (simulating wear of the armor over its warranted life)
- 30-minute panel-submersion requirement
- New size classification (ensuring all officers, small and large, receive equivalent protection)
- Requires edge-shot testing
- Changes to shot placement
- Increased number of panels required for testing

AN ALL-STAR LINEUP

ICON GLOSSARY

LIGHTWEIGHT

LIGHTWEIGHT

This vest is made from the lightest materials available in the industry. By interweaving these ballistic fabrics with our proprietary design techniques, this package achieves an unparalleled level of protection in a feather-light form.

SPECIAL THREAT TESTED

SPECIAL THREAT TESTED

This vest has been tested against additional threats that exceed the NIJ Standard-0101.06, ensuring protection from specific rounds as requested by various agencies and departments.

BERRY COMPLIANT

BERRY AMENDMENT COMPLIANT

This package adheres to compliance regulation associated with the Berry Amendment (10 U.S.C. 2533a) as implemented by DFARS 252.225-7012, which states this package must be made with 100 percent domestic content.

EXCLUSIVE

EXCLUSIVE

Known for having outstanding partnerships with suppliers, The Safariland Group utilizes materials developed exclusively for this package, making it entirely unique to any other product in the market.

ADVANCED STITCHING

ADVANCED STITCHING

This package features advanced stitching techniques for increased protection during edge shots, overall ballistic resistance, and reduced blunt trauma for improved recovery time. Advanced stitching techniques include P Stitching, Double P Stitching, Quilt Stitching, Vertical Side Tacs, Advanced X Stitching, Broken T Stitching and Top Tac.

SPIKE

SPIKE

This package is NIJ Standard-0115.00 approved for Stab Resistance of Personal Body Armor. This standard states the performance requirements for body armor resistance against circular penetrators.

EDGE BLADE

EDGE BLADE

This package is NIJ Standard-0115.00 approved for Stab Resistance of Personal Body Armor. This standard sets the performance requirements for body armor resistance against edged weapons.

NIJ STANDARD 0101.06 COMPLIANT

NIJ-06

The NIJ Standard-0101.06, Ballistic Resistance of Body Armor is the most comprehensive and rigorous body armor compliance standard that exists today. The NIJ tests ballistic resistant materials including soft armor, hard armor, correctional armor and multi-threat armor.

ABA® CONCEALABLE BODY ARMOR

ABA® sets the industry standard in ballistic protection. Utilizing the greatest in engineering technologies and design with next generation materials, ABA provides the optimum in performance and style when it comes to body armor. Our state-of-the-art testing facilities and exclusive alliances with the most knowledgeable partners in the industry enable us to maximize our innovations and to provide our customers with the best in ballistic protection.

SX

SX SERIES®

Development of the SX came with one goal – to create the thinnest and lightest ballistic package in the industry. In achieving this goal, the SX has become the flagship product in the ABA® line. Incorporating breakthrough technologies and exclusive materials, the SX offers unmatched performance and comfort – ushering in a new era in ballistic protection.

ABA® CONCEALABLE CARRIERS

XTREME® CARRIER

The Xtreme Carrier delivers the perfect blend of design and functionality, featuring advanced moisture and odor management in a lightweight, sleek look. Not only does the Xtreme Carrier protect the integrity of the ballistic package, its low-profile design offers increased mobility and comfort in a wide range of adjustability to suit the needs of various body types.

INTEGRATED GRIP-LOK™

Integrated Grip-Lok™ panel suspension system reduces curling and wrinkling

EXTERNAL HEXAGON RIPSTOP

Made from Hexagon Ripstop and antimicrobial moisture-wicking materials

STRAP SYSTEM

Combination 4- and 6- point strap system provides maximum adjustability

RETENTION TAILS

Standard retention tails (front and rear) helps to reduce shifting of armor panels (not shown)

INTERNAL X-STATIC®

Internal liner made of antimicrobial and anti-odor X-Static® silver fiber, which repels micro-organisms and reduces odor

FRONT PLATE POCKET

Dual-plate pocket with an internal back insert design accommodates soft-trauma insert and 5" x 8" and 7" x 9" IMPAC™ special threat plates

REAR PLATE POCKET

Dual-plate pocket with an internal back insert design accommodates soft-trauma insert and 5" x 8" and 7" x 9" IMPAC™ special threat plates

SECOND CHANCE® CONCEALABLE BODY ARMOR

Second Chance® body armor is made with pride and a long-standing history of time-proven results, which is driven by our dedication to saving lives. Our body armor is recognized for its dependable and consistent reliability. Constructed of the highest quality ballistic fabrics, our products are built to precise standards, achieving the utmost in protection and comfort for unparalleled flexibility and wearability.

SUMMIT™ SERIES

The development of the next generation Summit™ began with a single vision; to bring all of the industry leaders to one table to create a paradigm shift in body armor engineering. This exciting new flagship product from Second Chance®, marks the peak of performance, offering the softest, most comfortable armor available along with exceptional ballistic protection. The Summit incorporates the latest in state-of-the-art technologies and the most advanced exclusive materials from the industry's best innovators. The Summit is truly the pinnacle in body armor by offering softness, flexibility with performance that doesn't compromise.

THE SAFARILAND™ TRAINING GROUP

COUNTER AMBUSH

// ADVANCED FIELD TACTICS

Each year, 10 percent or more of law enforcement officers are murdered by ambush. However, it is possible for a patrol officer working alone to defeat an ambush set up by multiple suspects. This program teaches potential instructors with the information and practical training drills to train officers in ambush recognition and avoidance, potential threats to the community, types of ambushes, tactics to defeat an ambush, and field scenarios that are safe and realistic.

Contact the Safariland Training Group for details to take or host this course.

UNIFORM SHIRT CARRIER (USC)

UNIFORM-MALE

The Uniform Shirt Carrier (USC) features improved adjustability in the shoulder and side closure areas along with front and rear plate pockets. The USC is available in two and four pocket configurations, uniting functionality and style.

- Fits over color-matched uniform shirts providing an external carrier in disguise
- Wide range of adjustability
- Slips on and off easily over uniform

UNIFORM-FEMALE

The Female Uniform Shirt Carrier (USC) provides the same adjustability and comfort as the male carrier. Features include improved adjustability in the shoulder and side closure areas along with front and rear plate pockets. The USC is available in two and four pocket configurations, uniting functionality and style.

- Specifically designed to adhere to the female form
- Works well in conjunction with any featured female ballistic package
- Fits over top of and easily removes from color-matched uniform shirts providing an external carrier in disguise
- Wide range of adjustability
- Available in ABA® and Second Chance® shape and grade

TACTICAL ASSAULT CARRIER (TAC)

Ushering in the next generation of external carriers, the Tactical Assault Carrier (TAC) features a number of advancements including improved adjustability in both the shoulder and side closure areas. Made from a rugged 1000-denier Cordura® nylon, the TAC is built to last with the maximum level of comfort and durability. The TAC comes in a Clean, Pocket and Modular Webbing variation and is available in custom sizes.

CLEAN

MODULAR WEBBING

Front and rear modular webbing for attachment of optional tactical pouches

POCKET

Permanent pouches include: (1) 6" x 6" Utility, (1) 2" x 6" Flashlight/Baton, (1) 4" x 6" Dual Magazine (Handgun or Rifle), (1) 4" x 6" Radio, and (2) 3" x 3" Handcuffs

COLORS

TAC WITH TACTICAL OPTIONS

The TAC with Tactical Options includes durable non-skid material in the shoulder area for dual weapon retention, a rear drag strap for ease of extraction in a downed officer situation, and an upper arm and groin attachment system for optional extremity protection. The TAC comes in Clean, Pocket and Modular Webbing variations and is available in custom sizes.

SPECIALTY CARRIERS

With the ever-growing threats facing those who protect and serve the public, here are three function-specific duty carriers. These carriers are precisely designed with features benefiting an emergency medical services responder, firearms instructor or law enforcement officer.

FIREARMS INSTRUCTOR CARRIER

For those who train in an area with live firearms, the Firearms Instructor Carrier offers protection for instructors on ranges.

- Rugged 1000-denier Cordura® nylon exterior material
- Six permanent pouches: (1) 6" x 6" Utility, (1) 2" x 6" Flashlight/Baton
- (1) 4" x 6" Dual Magazine (Handgun or Rifle), (1) 4" x 6" Radio, and (2) 3" x 3" for Handcuffs
- Includes front and rear tri-pocket for upgrading protection with hard armor plates (5" x 8", 7" x 9" and 10" x 12" sizes)

EMS CARRIER

// EMERGENCY MEDICAL SERVICES

EMS personnel are often the first responders in cases of life-threatening emergencies and may benefit from wearing protective armor.

- Rugged 1000-denier Cordura® nylon exterior material
- Six permanent pouches: (1) 6" x 6" Utility, (1) 2" x 6" Flashlight/Baton, (1) 5" x 8" Medic, (1) 4" x 6" Radio, and (2) 3" x 3" for Handcuffs
- Includes front and rear tri-pocket for upgrading protection with hard armor plates (5" x 8", 7" x 9" and 10" x 12" sizes)

QUILTED CARRIER

Designed for law enforcement officers facing cold weather, the Quilted Carrier offers comfort and protection while insulating the body from the elements.

- Internal lining that provides insulation against the cold and wind
- Includes front and rear tri-pocket for upgrading protection with hard armor plates (5" x 8", 7" x 9" and 10" x 12" sizes)
- Comes in both male and female structured and unstructured sizes

TRAUMA KITS

The innovative Sons Trauma Kits eliminate the need for bulky medical pouches. Carry comfortably behind a ballistic trauma plate or under concealable armor. The fit is undetectable and the product is instantly accessible. Sons kits are packed for quick deployment and designed around injury patterns in order of priority for battlefield trauma treatment with the necessary supplies.

FIRST RESPONDER

// TRAUMA KIT

- Low-Profile Trauma Kit - 9" x 12" (22.86 cm x 30.48 cm)
- Machine-sealed medical grade vinyl and precision RF Welding produces a continuous waterproof seal. Designed to last 24-30 months.
- Designed for quick deployment, pull the full-length ripcord to open the pressure sealed kit.
- Using the Pull Handle, the kit can be retrieved easily from the small space beneath your ballistic protection.

TEMPERATURE / MOISTURE CONTROL

The CTAV™ is a body armor base layer system that attaches to existing armor carriers to deliver unparalleled levels of comfort, ventilation and evaporation. The CTAV integrates seamlessly with all body armor carriers and is currently fielded by military, law enforcement and corrections personnel.

NEW CTAV RETROFIT KIT™

CTAV // RETROFIT KIT™

- Features increased ventilation and accelerated evaporation behind body armor
- Proven to keep you cooler, drier and more comfortable in your concealable and tactical armor
- 9.1° Cooler with CTAV™

CTAV // SHIRT CARRIER SYSTEM™

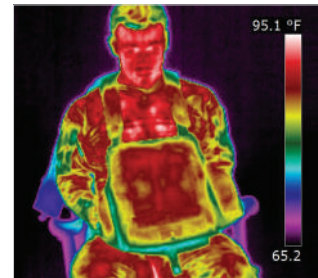

- Features a moisture-wicking, breathable base layer combined with the CTAV.
- Proven to keep you cooler, drier and more comfortable in your concealable and tactical armor.
- 9.1° Cooler with CTAV™

9.1° Cooler with CTAV™

WITH

ELECTROMAGNETIC DISCHARGE PROTECTION

Available for ABA® and Second Chance® products, ThorShield is designed to protect against electromagnetic discharge from Electrical Discharge Weapons (EDW). Compatible with Safariland® NIJ-certified body armor, ThorShield is ideal for patrol officers performing various duties.

THORSHIELD® ENERGY WEAPON PROTECTION FABRIC

- Thorshield® Electronic Control Device or Electro Shock Weapon protection
- Anti-static Discharge protection
- Extremely thin and light weight fabric
- Durable and transparent to existing NIJ rated carriers
- Machine washable per laundering instructions
